Dbl. Pink Oleander

Apple Blossom Oleander — 28 —

NERIUM, Oleander

Large evergreen shrub having long, narrow, pointed dark green leaves and showy flower clusters spring to fall. Very hardy, thriving in all localities with a minimum of care. We are offering an excellent supply of quality field grown plants of the following sorts:

APPLE BLOSSOM—One of the most popular, probably due to its long and continual blooming period. Produces good sized clusters of clear shell-pink blossoms in profusion. Single.

30 to 36 in. B&B.....\$.75
3 to 4 ft. B&B.....1.00

CERISE—Brilliant, single rose-red flowers produced in abundance. Blooms are more fragrant than most varieties. Upright habit of growth.

3 to 4 ft. B&B.....\$1.00

DOUBLE CREAM—Vigorous upright grower, blooming in spring and fall. Large clusters of double cream flowers.

30 to 36 in. B&B.....\$.75

DOUBLE PINK—Vigorous upright grower. Very hardy free blooming type, producing numerous clusters of beautiful double rose-pink flowers.

3 to 4 ft. B&B.....\$1.00

DOUBLE RED—Very similar in habit and appearance to double pink. Large, double, rich red, sometimes streaked with white.

3 to 4 ft. B&B.....\$1.00

DOUBLE WHITE—Another vigorous grower blooming profusely with large clusters of clear double white blossoms.

3 to 4 ft. B&B.....\$1.00

MRS. ROEDING—Being somewhat dwarf in habit of growth does not grow as tall as most sorts. This variety is indeed a beautiful sight when covered with its double salmon flowers.

3 to 4 ft. B&B.....\$1.00

SCARLET BEAUTY—A new beautiful, vivid single red. One of the most profuse bloomers, the plant being consistently covered with large clusters of showy dark red blooms. We predict a great future for this Oleander, knowing it will be acclaimed where ever Oleanders will grow. Our own introduction, a good supply available.

30 to 36 in. B&B.....\$.75

3 to 4 ft. B&B.....1.00

SINGLE HARDY RED—The hardiest of all Oleander. This sort has stood severe weather of below twenty degrees without freezing. Good clusters of large, bright red flowers.

3 to 4 ft. B&B.....\$1.00

SINGLE WHITE—Vigorous upright-growing plant producing numerous clusters of single pure white blossoms.

3 to 4 ft. B&B.....\$1.00

VARIEGATED—The narrow, pointed, dark green leaves are very effectively variegated with silvery-yellow stripes and streaks. Some of the new growth is entirely yellow adding to its attractiveness. In addition, large clusters of double pink flowers streaked with white are produced in abundance.

Summer Champion Apples

APPLES

Apples will grow and make beautiful trees in south Texas but very little production of fruit. They are

entirely successful from the central hill country northward, however. We offer a good supply of well developed trees.

✓ **DOUBLE RED DELICIOUS**—One of the finest red apples. Strong red skin, delicious flavor, large, crisp and juicy. Not self-fertile. Plant with Yellow Delicious.

✓ **SUMMER CHAMPION**—Known also as Holland. The best apple for south and southwest plantings. Produces good size, dark red, smooth, firm juicy-fleshed fruit. A consistent bearer. Self-fertile, does not need a pollinizer.

YELLOW DELICIOUS—The finest apple in its class. Self-fertile, an excellent pollinizer. Produces large, golden yellow, crisp, firm, delicious fruit.

APRICOT

Apricots are not only valuable fruit trees but highly ornamental as well. Their attractive foliage is preceeded by beautiful blossoms in the spring. The upright growing tree is ideal for locations where a smaller ornamental tree might be needed.

Our trees are budded on the finest root stock for maximum productivity and longest life. The best varieties are grown including the following:

✓ **BLLENHEIM**—Medium oval fruit, orange and deep yellow flesh. A leading commercial variety on the West Coast. Late June.

✓ **MOORPARK**—One of the better known and more popular apricots. Large fruit, deep orange in color with a dark red cheek. Very juicy, firm flesh of delicious flavor. Late June.

✓ **PERFECTION**—Early ripening apricot with large, uniform fruit, orange-yellow in color with a rosy blush. Good flavor, sweet and juicy. Hardy, vigorous growing tree. Early June.

✓ **ROYAL**—A fine apricot for all sections. Among the most dependable bearers. Good size fruit, dull yellow with orange blush. Mid June.

CHERRIES

The cherry is one of the most popular of the fruits. They are suited to many environments and though they respond to good care they thrive under neglect better than most other tree fruits. We offer the following varieties:

✓ **BLACK TARTARIAN**—Medium size, bright purplish-black fruit, thick, juicy, very rich and delicious. Tree vigorous and erect grower.

✓ **MONTMORENCY**—Medium size, bright red sour cherry. Tree comes into production at an early age. One of the strongest growers as well as one of the most popular.

FLOWERING CRABS

Very popular small ornamental shade and flowering trees producing tasty fruit as well. They are prized chiefly for their spectacular spring blossoms but their culinary and landscaping uses are myriad. They are hardy in all sections, easy to grow.

✓ **ELEYI**—Single purple-red blossoms, attractive reddish foliage in the spring. It is covered with dark wine-red crab apples in the fall.

✓ **HOPA**—In the spring it is completely covered with fragrant bright pink flowers. Later, clusters of small, red crab apples gleam brightly along its branches. This fruit makes very fine jelly.

✓ **SCHEIDECKERI**—The double blossoms are a light pink blended with white. Vigorous upright grower clothed with dark green foliage. Bright yellow crab apples produced in abundance. A handsome and attractive variety.

GRAPES

The grape is one of the oldest domesticated fruits. It seems to have been cultivated at the dawn of history. Its product was apparently no rarity in Noah's time. We offer excellent quality vines of the following species in considerable quantities:

✓ **BLACK SPANISH**—Heavy and regular producer of small to medium size grapes in fair clusters. Popular for juice and jelly.

Hvy. No. 1, B.R.....	\$.25
----------------------	--------

✓ **CONCORD**—Round solid blue-black fruits of medium size. Well known and very popular.

Hvy. No. 1, B.R. \$.15

✓ **EDNA**—Loose large clusters of good size oval white grapes. Normally seeded with moderately tough skin. Because of excellent foliage and good growing habits is ideal for arbor plantings. A good white table grape.

Hvy. No. 1, B.R. \$.15

PEACHES

We offer an excellent stock of trees established on Lovell root stocks. The successful growing of peaches depends upon selection of the proper varieties for a given section. Included in our production are those varieties that will do well in mild winter areas. Ripening dates are average for our area.

✓ **CHILOW**—Large yellow cling with slight red tinge on cheek. One of the finest eating peaches having unsurpassed flavor and fragrance. An outstanding variety doing well in all areas. Early July.

✓ **DIXIE RED**—Yellow clingstone with red blush. Flesh firm, matures early, attractive appearance, early July.

✓ **ELBERTA**—Large yellow freestone. Probably the best known and widest distributed peach in the country. For maximum production, however, it must have a longer dormancy period. Should be planted only as far south as the Texas hill country.

Concord Grapes

✓ **FRANK**—Large yellow cling. Sweet, firm, of good canning quality. Widely planted but not adapted as well as Chilow for South, Southwest, and Gulf Coast Texas. Mid-July.

✓ **FLORENCE**—White, semi-freestone of good flavor. Early, red blushed medium sized fruits. Early June.

✓ **GOLDEN JUBILEE**—Yellow freestone with attractive red blush. Excellent flavor with juicy, firm flesh. Does best from south-central Texas northward. Early July.

✓ **LEONA**—Large yellow freestone with red cheek. Without doubt the finest yellow freestone peach available for South Texas planting. Succeeds elsewhere as well. Early July.

Leconte Pear

PEACHES—(Continued)

✓ LUTTICHAU—Medium size, sweet, honey type. White freestone with pink cheek. Surest bearer withstanding late frosts without serious crop loss. Every home orchard should have one of this variety. Does well in warm areas. Mid-June.

✓ MAYFLOWER—Red-blushed white, semi-free-stone. A favorite for early market and home use. A widely known and distributed variety. Mid-May.

MELBA—White freestone with red colored cheeks. Distinguished by regular bearing and high quality of fruit. A good variety for southern areas. Late June.

✓ PALLAS—Medium sized white freestone of the Honey type. Regular heavy bearer. Another outstanding variety for South Texas planting. Deliciously sweet flavor. Late June.

Chilow Peach

PEARS

Very popular fruit tree of the genus *Pyrus*. Pears, as a rule, do not come into bearing until several years after planting. They live longer than any other fruit tree, however. We offer an excellent stock of the following varieties:

- ✓ **BARTLETT**—Large smooth yellow fruit with sweet white flesh. One of the best known and most popular pears.
- ✓ **GARBER**—Vigorous growing, reliable pear of good eating qualities. Fruit large and firm.
- ✓ **KIEFFER** — The old standby, growing and producing in almost all areas. Hardy, robust tree. Large hard fruit, cooking type, but good quality when well ripened. Fruit an attractive yellow.
- ✓ **LECONTE** — Attractive bell shaped fruit, creamy yellow with slight blush. An excellent variety bearing consistently good medium, soft fruit. Vigorous, upright growing tree.
- ✓ **MONTERREY**—A new pear of our own introduction showing great promise. Vigorous, thrifty growing tree. Fruit has a distinctive apple shape. Soft, well flavored yet the flesh has a desirable crispness. Seems to do very well under adverse conditions.

Kieffer Pear

PEAR ON QUINCE

We also offer pears budded on quince rootstock. They are more drought and heat resistant and will grow and produce better in dry, alkaline regions. The trees will not grow quite as large, but this may have its advantages. Some of these trees are multi-caned but all may be pruned to one single stem. The multi-stem trees are popular as ornamental trees as well. We offer two varieties, see descriptions above.

PERSIMMONS

Unfortunately we have a very limited quantity of these fine fruit trees available this year. They make very attractive trees with large, dark green leaves which turn to lovely colors in the fall. The big, orange-red fruit continues to hang on the tree until they are soft ripe.

✓ EUREKA—A very hardy variety with delicious, near seedless fruit. Big orange-red fruits freely produced.

/ TANI NASHI—Bright orange seedless fruit of good quality. Bears young and produces heavily.

PLUMS

Plums often bear the second year after planting. They are an ideal fruit for jelly, canning, preserving, and are most delicious for eating fresh. All of our plum trees are established on the finest rootstock, *Prunus Marianna*.

Months of ripening given are the average in our area. Ripening dates will vary from several days to several weeks, depending on weather conditions and geographical location.

✓ ALLRED—Outstanding, colorful red foliage all season. Good sized, deep red fruits of good quality. Unsurpassed as a beautiful and colorful landscape tree.

✓ BRUCE—Well known early ripening red plum. Medium sized fruit of a bright red coloring, reddish-amber flesh. Good market as well as home use variety. Consistent bearing adds to its popularity. June.

✓ BURBANK—Large, purplish-red plum with yellow, delicious flesh. A very prolific variety. Excellent eating and commercial plum. Late June.

✓ CLIMAX—Large heart-shaped deep red and yellow fruit. A Luther Burbank introduction. Flesh firm, richly flavored and juicy. June.

✓ EXCELSIOR—A purplish-red colored plum with greenish flesh. One of the best for planting in South Texas and the Gulf Coast area. Late June.

✓ MARIPOSA—Large purple red fruit with blood red flesh. A variety showing promise for our Southwest area. Ripens some three weeks after Santa Rosa. July.

✓ MEREDITH — New variety doing extremely well in the Southwest. Fruit large, nearly round. Greenish-red skin with yellow-amber flesh. Tender, juicy, very sweet and keeps well. An excellent commercial and home variety. Ripens about two weeks after Bruce—June.

✓ METHLEY—One of the better varieties. Strong, vigorous growing tree. Medium to large dark red fruit. Flesh amber tinged with red. Good shipper. Ripens just before Santa Rosa. June.

(Plums Continued on Next Page)

PLEASE NOTE: All fruit stock prices are based on a minimum of ten of a kind and size. An advance of twenty percent will be invoiced on quantities less than this minimum.

Black Walnut

✓CARPATHIAN ENGLISH WALNUT

A new hardy strain of English walnut discovered in the Carpathian Mountains of Poland. Trial plantings in various parts of the country indicate its ability to withstand severe cold, as well as hot, dry conditions of the South and Southwest. The tree will bear young and produce heavily. The quality of the nut is excellent.

It is our pleasure to offer a selected, superior strain of this new walnut. It grows into a beautiful specimen tree. This is a must item for your sales yard.

2 to 3 ft. B.R.....	\$2.00
3 to 4 ft. B.R.....	2.50
4 to 5 ft. B.R.....	3.00

PECANS

Every year we have several thousand pecan trees available. The majority of the trees are heavily developed stock ideal for retail yard sales. The varieties that we grow include the following:

✓ Burkett	✓ San Saba
✓ Delmas	✓ Stuart
✓ Garner	✓ Success
✓ Mahan	✓ Schley
✓ Moore	✓ Western Schley

Grown in a good rich loam soil with no fertilization of any kind, plus an abundance of irrigation water properly applied produces a pecan tree of unexcelled quality. Due to proper digging, storing and handling they transplant with an unusually high degree of success.

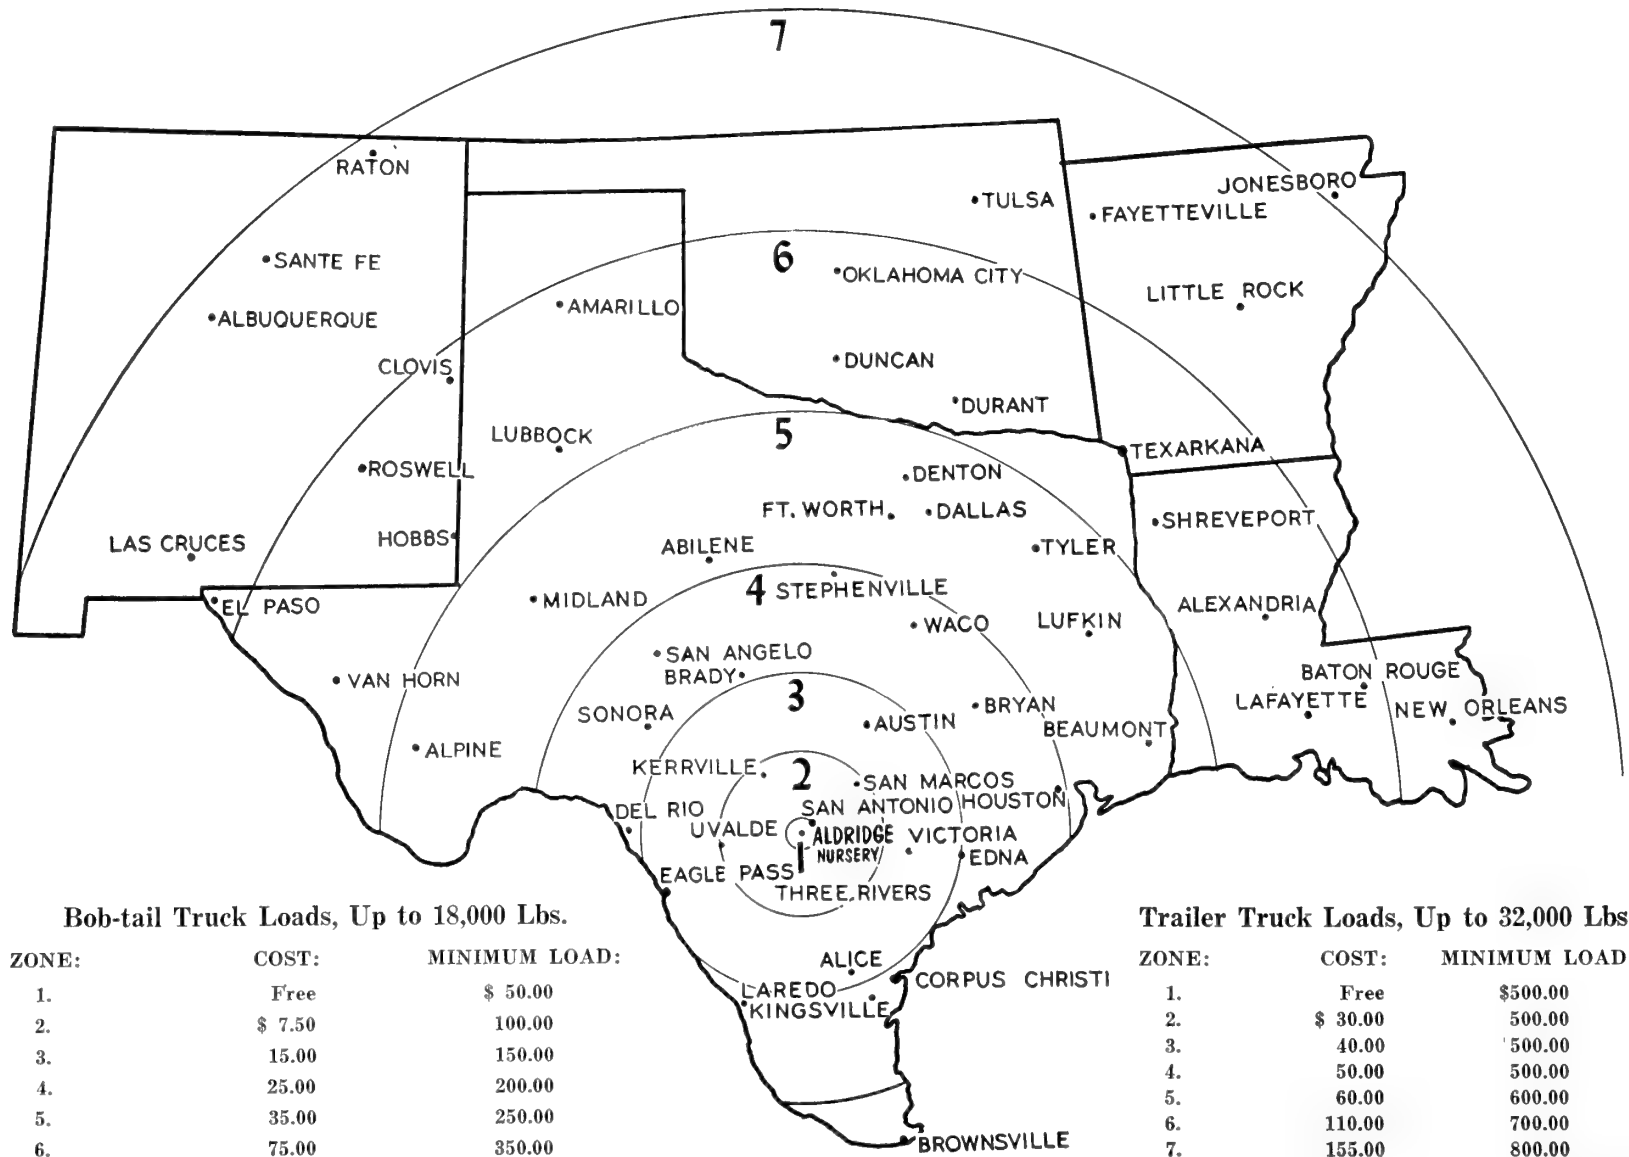

Our trees are available either bare-root or individually packed. The pack consists of a large quantity of packing material, sufficient to cover the entire root system without trimming it back and wrapped in new burlap. They will stay in excellent shape in the sales yard with an occasional watering.

Prices are as follows:

Size	Bare-root	Packed
5 to 6 ft.....	\$3.00	\$ 3.75
1 in. Caliper.....	4.00	5.00
1¼ in. Caliper.....	5.00	6.25
